Cilji in kompetence:

Cilji
Študenti:

- Razumejo temeljne značilnosti informacijsko-tehnološke revolucije in njeno kontekstualno vlogo znotraj informacijske družbe in globalizacijskih tokov.
- Poznajo različne teorije, ki opredeljujejo razmerja in povezave med tehnologijo in družbenimi spremembami ter kritično vrednoti koncept informacijske družbe z različnih vidikov.
- Poznajo internetne tehnologije in razume pojme, kot so: socialne mreže, virtualno okolje, virtualne skupnosti, socialni kapital, participacija, digitalna ločnica ipd.
- Kritično vrednotijo dinamiko internetno induciranih družbenih sprememb na socioekonomskem, kulturnem in političnem področju.
- Kritično vrednotijo priložnosti in nevarnosti, ki jih ponujajo internetne tehnologije v kontekstu trajnostnega družbenega razvoja.

Kompetence
Študenti:

- Sposobnost razumevanja razsežnosti informacijsko-tehnološke revolucije in koncepta informacijske družbe ter njunih medsebojnih razmerij.
- Sposobnost kritičnega vrednotenja vplivov informacijsko-tehnoloških dejavnikov na družbene spremembe.

Objectives and competences:

Objectives
Students:

- Understand the basic characteristics of information technology revolution and its contextual role within the information society and globalization flows.
- Get familiar with a variety of theories, which define the relationship and the correlation between technology and social change and critically evaluate the concept of information society from different perspectives.
- Get familiar with internet technologies and understands concepts such as: social networks, virtual environment, virtual communities, social capital, participation, digital divide, etc.
- Critically evaluate the dynamics of internet-induced social changes in the socio-economic, cultural and political field.
- Critically evaluate the opportunities and threats offered by internet technologies in the context of sustainable social development.

Competences
Students:

- Ability to understand the dimensions of information technology revolution and the concept of information society and their mutual relations.
- Ability to critically assess the effects of information technology factors on social change.

• Sposobnost kritične analize in vrednotenja različnih teoretičnih konceptov, ki opredeljujejo relacije med tehnologijo in družbo. • Sposobnost razumevanja in vrednotenja vloge internetnih tehnologij in Novih medijev na področju lokalnega in globalnega družbenega razvoja. • Sposobnost kritične analize spremenjenih socio-ekonomskih, kulturnih in političnih paradig znotraj informacijske družbe in njihove vloge v javni in zasebni sferi.	• Ability for critical analysis and evaluation of different theoretical concepts, which define the relationship between technology and society. • Ability to understand and evaluate the role of internet technologies and New media in the field of local and global social development. • Ability to critically analyse the changed socio-economic, cultural and political paradigms within the information society and their role in public and private sphere.
---	--

Predvideni študijski rezultati:	Intended learning outcomes:
Znanje in razumevanje: • Študenti znajo predstaviti razsežnosti informacijskotehnološke revolucije. • Študenti znajo ovrednotiti vlogo informacijskotehnološke revolucije znotraj razvoja informacijske družbe. • Študenti znajo kritično analizirati in vrednotiti različne teoretične koncepte, ki opredeljujejo relacije med tehnologijo in družbo. • Študenti znajo kritično analizirati ter vrednoti implikacije internetnih tehnologij na socioekonomske, kulturne in politične vidike vsakdanjega življenja in družbenega razvoja tako na lokalni kot tudi globalni ravni. • Študenti znajo kritično vrednotiti priložnosti in nevarnosti, ki jih ponujajo internetne tehnologije v kontekstu trajnostnega družbenega razvoja.	Knowledge and understanding: • Students are able to present the dimensions of information technology revolution • Students are able to evaluate the role of information technology revolution within the information society development. • Students are able to critically analyse and evaluate the different theoretical concepts, which define the relationship between technology and society. • Students are able to critically analyse and evaluate the implications of internet technologies on socioeconomic, cultural and political aspects of everyday life and social development at both local and global levels. • Students are able to critically evaluate the opportunities and threats offered by internet technologies in the context of sustainable social development.

Metode poučevanja in učenja:	Learning and teaching methods:
1. priprava študenta na predavanja 2. predavanje 3. študija primera 4. problemsko učenje 5. seminarska naloga	1. student preparations for lectures 2. lecture 3. case study 4. problem based learning 5. seminar paper

Načini ocenjevanja:	Delež/Weight	Assessment:
1. pisni in/ali ustni izpit	60,00 %	1. written and/or oral exam and/or exam
2. seminarska naloga	40,00 %	2. seminar paper

Ocenjevalna lestvica:	Grading system:
5 - 10, pri čemer velja, da je pozitivna ocena od 6 - 10	5 - 10, a student passes the exam if he is graded from 6 to 10
