Cilji in kompetence:

Cilj predmeta je definiranje zdravja in pravice do zdravja v kontekstu teorije in prakse človekovih pravic.

Cilj predmeta je:

- Poznavanje človekove pravice do zdravja
- Poznavanje pomena zdravja
- Poznavanje ureditve zdravstva in natančneje zdravstvenega varstva
- Pridobitev znanja s področja trenutnih težav s katerimi se soočajo države na področju zdravstva

Kompetence:

- Razumevanje razlike med pravico do zdravja in pravico do zdravstvenega varstva
- Razumevanje socialne pravičnosti in njene vloge v zdravstvu
- Pridobitev sposobnosti za kritično analizo trenutnega stanja na področju zdravstva

Objectives and competences:

This course attempts to define health and health care in the context of human rights theory and practice.

The aim of the course is to:

- acquaint students with the human right to health;
- acquaint students with the meaning and importance of health system;
- acquaint students with the knowledge about the organization of health system;
- acquaint students with the knowledge of current issues in the field of health care.

Students should be able to generally understand:

- meaning and importance of the right to health;
- basic concepts of the health system;
- social justice and its role in health care;
- basic models of the health care;
- students should be able to critically analyse current situation in the health sector.

Predvideni študijski rezultati:

Študenti bodo razumeli osnovne koncepte zdravstvenega sistema, kar jim bo pomagalo razumeti njegovo strukturo in delovanje. Poleg tega bodo študenti razumeli tudi sodobna vprašanja na področju zdravstva in jih zmožni kritično analizirati.

Intended learning outcomes:

Students will learn the basic concepts of the health system, which will help them to understand structure and functioning of the health system. Furthermore, students will understand contemporary issues in the field of health and be able to critically analyse them.

Metode poučevanja in učenja:

1. Predavanja
2. Projektno delo oz individualne naloge

Learning and teaching methods:

1. Lectures
2. Project work and individual assignments

Načini ocenjevanja:

1. Študija primera
2. Pisni/ustni izpit

Delež/Weight

- 40,00 %
- 60,00 %

Assessment:

1. Case study
2. Written/oral examination
